Lot #142
Okeechobee Fla. 34972

June 23, 2021

Mr. Sacco,

I was contacted by Code Enforcement Tuesday morning about a complaint that was called into them about an illegal structure being built at the rear of your home. They checked to see if any permits were issued and there were none. He asked if we approved any structures for that residence. They now have an open case regarding lot #142. They are aware of how Indian Hammock works when it comes to approving any building on lots. Currently, I am asking that all construction stop and that you turn into the office a filled-out building application. This will need to go the board for approval before any more work continues.

Code Enforcement will not proceed any further on there end at this time, by allowing you to go thru the proper channels to properly get your structure approved and permitted.

I have attached with this letter the building package for you to fill out if you choose to continue with your project.

If you have any questions or concerns, please contact me at the office.

Respectfully,

Robert Baum
